INTRODUCTION

As the USA Distributor of T3 Systems, Olson Visual brings a long history of customer satisfaction in offering this innovative product. We know large graphics and how they are used for events and displays. Give us a call so we can help you make your campaigns, displays, and your life easier by using T3. It's a great system.

NO TOOLS REQUIRED

It is hard to believe that large structures can be assembled without tools, but believe it. Almost anyone can twist and lock each piece together and before you know it, the structure is up.

RECONFIGURABLE

T3 parts are just that, parts. They can be used in many different ways. Purchase a 20'x10' booth and you can easily create a 10'x10' booth for your smaller shows. With foresight, the graphics can also be planned out so you don't have to purchase different sets. After a few years of use, you can design completely new booth configurations and reuse all the parts you already own.

SIMPLE TO ASSEMBLE

Once you feel the ease of the twist and lock of the patented connection system, just follow the easy to read color charts provided with each T3 System kit. Once the aluminum structure is constructed, graphic film or other substrates can be applied using magnetic tape or fabric can be installed using a silicone edge bead that fits in our channels.

FULLY REUSABLE

A T3 System booth or display is totally reusable. All the aluminum and plastic parts carry a lifetime guarantee. Believe it!

HOW IT WORKS

T3 is an elegantly simple system based around a connector and interlocking tube. The 33mm tube is capped with a cross shaped bayonet which fits into the cube connector with a simple twist-lock action requiring no tools. The tube comes in several profiles according to the kind of panel to be attached or the type of structure to be created.

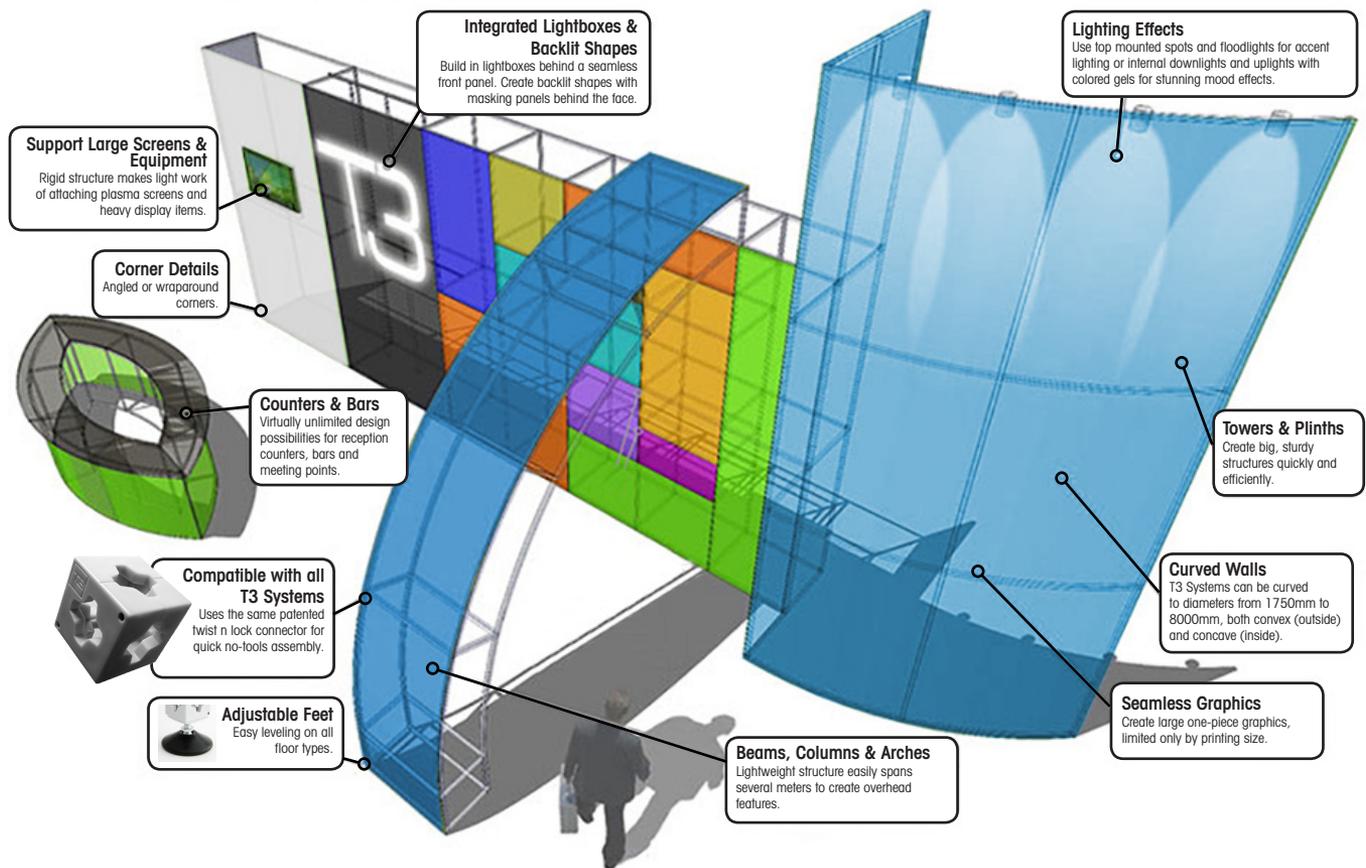

**TWIST, LOCK,
& YOUR DONE**

UNIQUE STRUCTURE DESIGNS

Brilliance is in the details. The right graphics, the perfect table, a conference area to close business, these are the little things that can really turn a good exhibit into a great show. Structure has the rental accessories that are so important, and yet so often overlooked by exhibitors who do not take the time to understand your goals the way we do. After you have the right display, effective brand graphics and the perfect lighting, we have the banner stands, magazine racks and furniture you will need to create the best experience for your clients, constituents and customers.

MATERIALS

Polyester Based Film
Backlit Film
Fabrics

Mounted Materials
Panel Substrates
Acrylics

ACCESSORIES

The T3 System offers many accessories to help customize your booth or display. Curved bars can be fabricated from the standard aluminum stock or there are notched plastic sections that can give your booth different looks. Wheels, lights, feet, doors, and flat screen mounts are available. Backlit images can dramatically give your display impact. We continually look for unique ways to use LED lighting for backlit imagery and the longevity that it brings. Let us know your vision and we will suggest the right accessories to make it come together.

WHERE TO START

Give us your requirements and ideas on what you need in a display. Better yet if you can send us rough sketch, we will begin the design process. We try and make sure all of the details are covered. Examples are: booth size, shipping requirements might dictate size of final crating, how will assembly be carried out, electrical requirements, and graphic requirements. Once you receive a detailed layout, then final discussions begin to come up with pricing and scheduling. Let us help you.
